## **NASS Seeks Feedback about 2019 Crops, Grain Stocks**

CHARLESTON, W.V. – During the next several weeks, the U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) will conduct two major mid-year surveys, the June Agricultural Survey and the June Area Survey. The agency will survey 700 farms across West Virginia to determine crop production and supplies levels in 2019.

"Due to the widespread and significant impact of its results, these are two of the most important and well-known surveys NASS conducts," explained Charmaine Wilson, West Virginia State Statistician. "When growers respond, they provide essential information that helps determine the prospective production and supply of major commodities in the United States for 2019. Everyone who relies on agriculture for their livelihoods is interested in the results."

NASS gathers the data online, by mail, phone and in-person interview. Growers provide information on crop acreage, grain stocks, livestock inventory, cash rents, land values, and value of sales.

NASS will compile and analyze the survey information and publish the results in a series of USDA reports, including the annual *Acreage* report and quarterly *Grain Stocks* report, both to be released June 28, 2019.

"We recognize this is a hectic time for farmers, but the information they provide helps U.S. agriculture remain viable and capable," Wilson stated. "I urge them to respond to these surveys and thank them for their cooperation."

All reports are available on the NASS website: [www.nass.usda.gov/Publications](http://www.nass.usda.gov/Publications). For more information, call the NASS West Virginia Field Office at (800) 535-7088, or visit [https://www.nass.usda.gov/Statistics by State/West Virginia/](https://www.nass.usda.gov/Statistics_by_State/West_Virginia/).
